what really counts
major preoccupations
worries & aspirations

The aim of the project is to create a system to allow the parents to keep track of their kids

will it
gives
accurate
location

Whether it
is safety
gadget first

what friends say
what boss say
what influencers say

If success
can we
implement
for all..?

Whether if it
doesn't work
what's the
child life..?

Whether this process applicable to all children

delivering
high
search
accuracy

, with the child tracking system the parent can track and monitor

contain the
child details

environment
friends
what the market offers

attitude in public
appearance
behavior towards others

Good idea
when it
starts
works

Try to help

Well fare by
expensive

fears
frustrations
obstacles

What about
life..?

If process becomes fail life of the child

If the gadget is removed from child what is the next process?

“wants” / needs
measures of success
obstacles

Reduces the work for social economic workers

A child can be easily monitored and retrieved back

Child can be monitored when ever needed
